Worksheets Waste Audits

There are **2** Waste Audits to complete. Each audit is broken down into three stages: the question stage, the rating stage and the reporting stage.

Resources have been provided to help you in completing, tracking, and evaluating your progress through the waste lifestyle audits.

1. Waste Audit Status Checklist
2. Waste Audit Notes
3. Waste Audit Worksheets

As you complete each worksheet, you may enter your responses into the audit program on the program web site to have the program calculate your score automatically. Otherwise you may enter your findings directly onto the following waste audit worksheets and then manually calculate your scores.

Note: To calculate your school's total scores and overall ratings, see the School Ratings Calculation Worksheet included in the Lifestyle Audits package.
